STAFF WRITER 9:47 HRS IST

HS Rao London, Feb 6 (PTI) A mystic Indian has successfully documented the ancient science of Anthro-Biometry, the science that incorporates a universal system of Sacred Geometry to predict the rise and fall of man's activities and that of civilisations. Chennai-based R K S Muthukrishnan, who solved the great Pyramid mystery in 1997, has come out with a new book on Anthro-Biometry, the ancient science which was first perfected by the Siddhars of South India, great yogic masters who went beyond the practice of yoga into the mystical realms of attaining miraculous powers. The new e-book titled "The Egyptian Code - A Secret Code of the Pharoahs That Can Turn Small Businesses into Empires", explains in detail the intricacies of this ancient science. Muthukrishnan said last night, Pharoahs of Egypt made widespread use of this ancient science in their golden period, in constructing pyramids, most importantly the Great Pyramid at Giza.
